TRAVEL COSTS ADDITIONAL TO WORKSHOP FEE

## 1. CUSTOM WEBINAR

Webinars are a great way to learn about a specific part of the heritage planning process, or to add a new skill to a community's heritage toolkit. For each custom webinar, we will prepare customized examples that fit with the context and needs of the community.

### Topics for custom webinars include:

- Developing a Heritage Register
- Establishing Conservation Areas
- Heritage Property Management
- Heritage Revitalization Agreements
- Writing Statements of Significance
- Using the Standards and Guidelines
- Accessibility for Persons with Disabilities
- Making the Case for Heritage

## 2. HERITAGE BASICS

*Heritage Basics* is great for the community who needs a refresher on the best practices for heritage planning as it pertains to their context. The workshop includes a consultation call with the presenter so that the workshop can be customized to the community's specific situation, and the variety of tools covered in the presentation will be relevant to local capacities and needs.

An hour-long Q&A session with the facilitator following the presentation allows the community to dig into the specifics of their context and get the answers they need to embark on a self-directed heritage planning strategy.

# Heritage Workshops Content

## **3. HERITAGE BASICS + HERITAGE VALUES**

The *Heritage Values* workshop includes everything that is offered in the Heritage Basics workshop and more. In addition to the *Heritage Basics* presentation and Q&A, the *Heritage Values* workshop facilitates a conversation with participants to identify the heritage values in their community and to find the heritage resources that reflect those values.

Participants in this workshop will leave the session with a solid understanding of their community's heritage, and a basic understanding of the tools available to conserve and manage heritage resources.

\*\*This workshop is designed to be conducted in person and requires a time commitment from 9am to 2:30pm.

## **4. HERITAGE BASICS + HERITAGE VALUES + HERITAGE PLAN**

This full day workshop builds upon the *Heritage Basics* and *Heritage Values* sessions. Once participants identify their community's heritage resources and heritage toolkit, the *Heritage Plan* workshop facilitates a discussion to build a heritage work plan for their community. This work plan will be based on the heritage values and goals identified in the *Heritage Values* workshop and can take many forms - from building a draft outline for a heritage management plan to outlining a basic conservation strategy for a specific resource.

\*\*This workshop is designed to be conducted in person and requires a time commitment from 9am to 4:30pm.
